

Passport

Temperature Screening Station

- Accurate and discreet
- Meets the latest FDA guidelines
- NDA compliant
- Provides a safe social distancing
- Ideal for key access points
- Kiosk or Mobile
- Built in the USA

Fixed Station

Mobile Station

Meets FDA Guidelines

Pioneer Passport meets the required accuracy specification for initial body temperature assessment during the Covid-19 Public Health Emergency.

Same Results as Temporal Thermometer

Passport measures the body skin temperature with $\pm 0.5^{\circ}\text{F}$ accuracy. With the combination of a reference heat source, Passport performs as well as an infrared temporal thermometer.

Safe Social Distancing

Passport can be configured either as a fixed station or as a battery-powered mobile station, while adhering to the CDC's recommendation of 6 feet social distancing.

Fast Set Up and Operation

Pioneer Passport is ideal for key access points, and can be set up and utilized in just minutes.
